Thank you for once again joining us here in Fargo for our Annual Winter Conference. For this year’s conference, we have quite a few new workshops as well as some speakers you’re sure to recognize. The conference committee has put in a lot of work bringing this together with the goal of providing something of interest for all of our attendees.

This year we are proud to have partnered with the Organic Academy Road Show (OARS) to help beginning Organic farmers and ranchers get started off on the right foot. These workshops on Thursday the 26th will cover the many challenges and rewards of organic farming and ranching as well as answer any questions you may have.

We have also lined up two great Keynote Speeches that will be very informative and we know you will enjoy them. On Friday you will be hearing from Sarah Vogel as she discusses her book “The Farmer’s Lawyer” and her case on behalf of the farmers against the federal government during the farm crisis of the 80’s. Then on Saturday Anne Biklé and David Montgomery will be talking about soil health from all their research featured in their many books, including “The Hidden Half of Nature” and their latest “What Your Food Ate”.

I would like to thank all of our sponsors. Without them, we could not be able to host this conference for our members and their families. Please visit their booths, help support them, and thank them for helping us help you with knowledge and resources found throughout the conference.

As always, we are open to ideas to make next year even better. We are looking for motivated people to join our board and help us put these ideas into motion. Please do not hesitate to let one of your board members know if you have any questions or suggestions for us. We hope this year’s conference will not only be informative to you but also give you a chance to catch up with and socialize with old friends and connections and make some new ones in the process!

—Martin Goter, 
NPSAS Board President
At HEARTLAND, we strive to close the distance between the High Plains wheat farmers and craft bakers everywhere, and to contribute in our small way to better life and better bread for farmers, bakers, and everyday bread eaters.

We have long been developing relationships with farmers who grow grain to the exacting standards of our customers and our third-party certifying body. These men and women are the foundation of our quality. Their knowledge, experience, and hard work are evident in every bag of Heartland flour and in the outstanding baked goods of our customers.
THURSDAY
Breakfast
Rolls and Coffee
Lunch
Tossed garden greens with toppings: assorted cheeses, bacon crumbles, sunflower seeds, hard boiled eggs, peppers, diced tomato, cucumber, and croutons
Grilled Chicken Breast
Cream of Asparagus or Vegetable Cheese Medley soups
Assorted Cookies and Bars
Dinner
Tossed Garden Salad
Rosemary orange breast of chicken
with citrus zest on blended rice and fresh steamed vegetables
FRIDAY
Breakfast
Chef’s choice egg bake with ham
Biscuits and Gravy
Sliced Fresh Fruit
Lunch
Ground beef and pork carnitas served with cilantro lime rice and Chipotle Black Beans
Served with soft flour and crispy corn tortillas, lettuce, cheddar-jack cheese, tomato, onion, jalapeno, sour cream and tortilla chips with salsa, chipotle queso, and guacamole
Chips, Salsa and Guacamole
Tres Leches Cake or Chef’s Choice
TASTE OF AG EVENT
Hors d’oeuvres
Roasted Hummus with Vegetables and Pita Chips
Dakota Steak Bites
Stuffed Mushrooms
Million Dollar Bacon
Chef Specialty Crostini: Bruschetta
Chef Specialty Crostini: Apple with Caramelized Onion and Gorgonzola
Cash Bar
SATURDAY
Breakfast
Chef’s choice egg bake with bacon
Muffins
Sliced Fresh Fruit
Lunch
Chefs’ choice salad
Chicken Parmesan
Meatballs
Pasta with sauce
Breadstick
Keynote Session Overview

Sarah Vogel,
Author of
The Farmers Lawyer

Friday, January 27
9:45 am - 10:45 am

Sarah was raised in a strong North Dakota Nonpartisan League family where she learned to fight for “the little guy.” Sarah went on to serve two terms as North Dakota Commissioner of Agriculture – the first woman in U.S. history to be elected to this position in any state. Throughout her career, she has continued to advocate for family farmers, women, and Native Americans. Sarah currently serves as a member of the Agriculture Subcommittee to the USDA Equity Commission and lives in Bismarck, ND.

Anne Biklé,
Science Writer, public speaker, & Co-Author of
The Hidden Half of Nature

Saturday, January 28
2:45 pm - 3:45 pm

Anne Biklé is a science writer and public speaker focusing on the connections between people, plants, food, health, and the environment. She has been known to coax garden plants into rambunctious growth and nurse them back from the edge of death with her regenerative gardening practices. Her work has appeared in digital and print magazines, newspapers, and radio and her gardening practices have been featured in independent and documentary films.

David Montgomery,
MacArthur Fellow, professor of geomorphology, & Co-Author of The Hidden Half of Nature

Saturday, January 28
2:45 pm - 3:45 pm

David R. Montgomery is a MacArthur Fellow and professor of geomorphology at the University of Washington. He is an internationally recognized geologist who studies the effects of geological processes on ecological systems and human societies. His work has been featured in documentary films, network and cable news, TV, and radio including NOVA, PBS NewsHour, Fox and Friends, and All Things Considered.

You won’t want to miss these presentations!
We build sustainable food systems.

SUSTAINABLE  We look beyond this year’s harvest, beyond maximizing output, no matter the cost. We want to build our soils, not deplete them. We want our water and air to be cleaner than they were before. We want the people who work with their hands to make a good living. And we want more of the next generation to see a future in farming.

FOOD  Sustainably produced, nutrient-rich food nourishes the body and the soul. Good food has the power to build communities as we connect growers and eaters, and as we all celebrate our connection to each other and the world through our meals. We want this high-quality food to be available as a first choice for consumers in our region and beyond.

SYSTEMS  We focus on more than the acre before us. We know that what we do has consequences far beyond any one farm—farming affects the quality of our communities, relationships, assets, culture, and satisfaction with our lives. We need people working together across many disciplines to create a system of support for sustainable food production.

Let’s work together to build a sustainable future.

About the Organic Academy Road Show

The National Center for Appropriate Technology with nationally recognized organic leaders will offer an Organic Academy Road Show (OARS) session in Fargo, ND on January 26 & 27th. This will give an opportunity for beginning farmers and ranchers in the northern Great Plains to explore the important and economically viable regenerative certified organic production systems for grains, oilseeds, and pulses. Thirty scholarships for beginning farmers and ranchers are available for up to $200 each to defray costs of attending. There is no registration fee, but registration by January 15, 2023. The link can be found on the 2023 NPSAS website conference page.

Also, the Northern Plains Sustainable Ag Food and Farming Conference will take place at the same location, January 26th - 28th and attendees to the OARS session are welcome to register separately for the event at www.npsasa.org

Bringing in the Community

This event will host intensive training sessions and one-on-one technical assistance. In addition to the farmers and ranchers taking part, the sessions will include other members of their agricultural communities, including civic leaders, county Extension agents and officials from USDA agencies such as the Farm Service Administration and the Natural Resources Conservation Service during an open public event the night of January 26th at the Holiday Inn.

Anna & Doug Jones-Crabree

Anna and her husband Doug own and manage Vilicus Farms, a first generation, organic, 12,508-acre dryland crop farm in Northern Hill County, Montana growing a diverse array of organic heirloom and specialty grain, pulse, oilseed and broadleaf crops under five and seven-year rotations.

Jeff Schahczenski

Jeff is an Agricultural and Natural Resource Economist with the National Center for Appropriate Technology. His work includes publication of studies and education on crop insurance, conservation, national agriculture public policy, transgenics, blockchain agriculture supply-chain management, soil health, biochar, and the role of agriculture in climate disruption.

Jess Algiers

Jess grew up on family Ranch North of Stanford. He Graduated MSU Bozeman with a B.S. Degree in Animal Science in 1971. He rotates his cattle through 39 pastures over the course of a year. This last year (2022) he grew: Kamut, emmer, winter wheat, peas, Kernza and cover crops for the cattle. He planted Rye for fall and spring grazing.

Wendy Paulsen

Wendy Paulsen has been a Staff Certification Specialist / Inspector at MCIA for over 7 years. She works on all aspects of certification from talking to new clients to issuing certificates and works in all scopes of certification including crops, livestock, and processing. She coordinates and provides annual training for MCIA inspectors.

In Clay County the worms in learn benefit and types of Extension Master Gardeners of Kids Farming Workshop - by hiv the crops that will produce better with farm a the different; bee keeping what kinds of markets are developing around bees; hives; having a bee house/hive and learn the bees' impact on farming and gardening. This session is facilitated by Extension Master Gardeners of Clay County.

**Breakout Sessions - Friday 3:15 - 4:15 pm**

Lessons From the Past By The Farmers Lawyer

Vogel will share inspiring stories about how farmers working together survived tough times in the 1930s and the 1980s and how farmers in the 2020s can apply those lessons to the tough times and problems of today.

**Field Pea Production And The Use of Native Rhizobia for Nitrogen Fixation - by Christopher Graham**

Should you be growing more peas? Hear how the use of natural sources of rhizobia serves as an inoculant for field peas. In addition, you’ll get a deeper look into the general production notes on growing field peas in South Dakota.

**Breaking Carbon Sequestration Through Bale Grazing & Keyline Cultivation - by Erin Gaugler**

Kids Farming Workshop - by Extension Master Gardeners of Clay County

In this workshop participants will learn how to make seed balls for birds and other wildlife. This session is facilitated by Extension Master Gardeners of Clay County.

**General Session - Saturday 8:30 - 9:45 am**

Organic Farmers Panel

This is often a highlight of the conference, hearing from farmers and ranchers with boots in the dirt. They share stories on what, why, and how they operate. Audience members get a chance to ask questions on best practices on equipment, fertilizer, certification, cover crops, and more.

**Breakout Sessions - Saturday 10:00 - 11:00 am**

The Dirt Trilogy - Destruction, Insight, and Cure - By David Montgomery

Humanity has a tangled relationship with soil. Too many soils beneath farms and gardens are suffering today. But as authors Montgomery and Biklé discovered, we can change...
farms and gardens are suffering today. But as authors Montgomery and Biklé discovered, we can change soil for the better too. Digging into the possibilities and opportunities for restoring soil transformed them, growing new ideas about the grand hallmarks of civilization—the practice of agriculture and medicine. A handful of dirt, they learned, can offer untapped potential or an endless problem.

Grazing Management Practices for Soil Health- by Miranda Meehan

What are the impacts of livestock integration into cropping systems on soil physical and chemical properties? You'll learn how grazing management influences these properties.

How to Find, Write & Manage a Grant to Support a Sustainable Ag Project on my Farm - Zach Paige

In the past ten years, Zachary has secured over 1 million in grants from private, federal, and state organizations to fund sustainable farm projects for his farm as well as for organizations. In this session, Zachary will break down grant writing logic and go through strategies to locate and write a successful application.

Kids Farming Workshop by Extension Master Gardeners of Clay County

In this workshop participants will learn about plant propagation and engage in hands-on projects and learn about a few different aspects of farming and gardening. This session is facilitated by Extension Master Gardeners of Clay County.

General Session - Saturday 11:15 - 12:15 pm

Regenerating Agriculture: A Viable Future - by Ryan Schmid

Regenerative agriculture is the hot, new buzzword sweeping across farming today. From scientists to corporations, to farmers themselves, it can feel like everyone is trying to capitalize on this new craze. But what is regenerative agriculture, and can it deliver the environmental and economic benefits many of its supporters claim? Come and learn how farmers themselves are helping researchers develop answers to these questions.

General Session - Saturday 1:30 - 2:30 pm

Value-added Ag Panel

Everyone wants to get more money for their product, but you can't get more than what the buyer is willing to pay. Or can you? What if you made the product look different. We'll talk to two producers who took a standard farm commodity and made it into a much more valuable end direct to consumer product. Get your questions ready and learn how you can make more money from your farm.

KEYNOTE - Saturday 2:45 - 3:45 pm

What Your Food Ate and Why it Matters - Anne Biklé

An exploration and synthesis of history and science reveals that the roots of good health start on farms. How we treat the land and soil we use to raise crops and livestock reveals the intricate and long-running connections between soil health and human health. The pathway runs through crops, farm animals, and microbiomes, and eventually into our own bodies. It turns out that there is more to agriculture than feeding the world. We also need to nourish people—and the land.
A SPECIAL THANKS TO OUR CO-SPONSORS!

Your support makes this conference possible!

The following is a list of those who have generously cosponsored the 2023 Food & Farming Conference. We apologize for any omissions or errors.

NCI’s mission is to support regional agriculture and value added processing by conducting educational and technical programs that expand and maintain domestic and international markets for northern grown crops.

TECHNICAL SERVICES

The Northern Crops Institute (NCI) has a technical staff comprised of highly experienced food scientists, processing technologists, and project managers. Our team has the experience and resources to bring your vision to life; from start to finish we partner with you through the process, creating a concise and clear experience to help you scale-up your product development right to your factory and consumer production.

AREAS WE SPECIALIZE IN

- Soy Foods
- Baked Goods
- Feed Production

- Extrusion
- Pasta
- Wine & Fermentation

- Oilseed Processing
- Milling
- Protein Isolation

EDUCATIONAL PROGRAMS

NCI offers educational programs that provide:

- Hands-on and virtual training on commodity marketing & utilization
- Weekly webinar series
- Fullfat Soybean Meal and Ancient Grains of the Great Plains Handbooks

IF YOU ARE INTERESTED IN MORE INFORMATION ON NCI’S TECHNICAL SERVICES WE PROVIDE, PLEASE CONTACT:
